

# Mohammadreza Salek

## Front-End Developer +3 years experience

With +3 years of experience in frontend development, I possess expertise in modern JavaScript, TypeScript, and both mobile and frontend frameworks. My strong troubleshooting abilities and research skills make me an agile Frontend Developer capable of delivering high-quality code within tight deadlines.

## Experience

### Igloovy ([website link](#)) — Front-End Lead

February 2023 - Present

- Developed front-end from scratch with **Next.js** and **Tailwind CSS**
- Implemented **GraphQL** and **Apollo** for efficient data management.
- Created a unique **hexagonal map** feature for land purchase and empire building.
- Built a **permissions** dashboard using **bitwise technology**.
- Designed a dynamic **timeline** page with **social media features**.
- Implemented **friend request** and **direct messaging** features.

### Fanap Plus — Front-End Developer

August 2022 - February 2023

- Led the development and launch of Gerehverse, an AI-enhanced, personalized learning platform.
- Developed a **PWA** and **TWA** to expand mobile application accessibility.
- Created a **React-Native** WebView app, handling **push notifications**. and **SMS retrieval codes**, improving UX .

### Antbuildz ([website link](#)) — Front-End Developer

February 2022 - August 2022

- Migrated websites from **React** to **Next.js**, enhancing performance and user experience.
- Implemented a payment feature with **installment options**, enhancing transaction flexibility.
- Redesigned websites, and enhanced **UI/UX** for a better user experience.
- Enhanced the website with a **mega menu** for improved navigation and accessibility.
- Integrated **multilanguage support**, expanding the website's accessibility and reach.

### Elitive — Front-End Developer

March 2021 - February 2022

- Developed and maintained numerous websites and applications using **React**, **Next.js**, **React Native**.
- Launched [Didex](#), a platform tailored for Crypto Exchange.
- Developed [Joy](#), an **app** for planning key life events, available on the App Store.
- Created four **React Native applications**, such as Zitop, unpublished due to startup marketing challenges.

### ANP([website link](#)) — Front-End Developer

August 2020 - March 2021

- Designed and developed an IoT platform named IoTsmile that facilitated real-time communication and interaction between devices.
- Developed REST APIs and web interfaces to enable seamless integration of IoT devices with other systems.
